| Skin irritation or rubbing      | 1. Wear toe socks.  
2. Ensure footwear is wide enough  
3. Use one of the following modifications to trim away bothersome material |
| Too much spread on pinky toe    | 1. Cut off half of the pinky spacer.  
2. Cut off the full pinky spacers. Shown in GREEN |
| Correct Toes slide off foot     | 1. Try toe socks, or conventional sock over CT (stretch socks’ toe seams first).  
2. Trim big toe and/or pinky toe pillar, to allow CT to slide further on. Shown in BLUE |
| Too tight on toe(s)             | 1. Try a larger size of CT.  
2. Cut a small hole on the top and/or bottom. Shown in PURPLE |
| Bunion                          | Add a shim in the appropriate CT slot. See YELLOW arrow.  
*Only add shims after 3-4 months of regular Correct Toes use.  
• What’s a shim? Take an old shoe liner and cut a piece to fit the slot in your Correct Toes. |
| Tailor’s Bunion                 |                                                                                |
| Hammertoe                       | 1. Cut a small hole in CT over your hammertoes. Shown in PURPLE  
2. Trim away the interspace. Shown in MAGENTA  
*Correct Toes are only effective for hammertoes that are flexible (can be manually straightened). |
| Corn                            | 1. Apply Moleskin  
2. Cut a small hole in the top of CT over your affected toe. Shown in PURPLE or MAGENTA  
3. Trim away a portion of the pillar. Shown in red |
| Webbed toes                     | Trim away a portion, or entirely remove the pillar where it conflicts with webbed toes. Shown in ORANGE |
